LinkedIn: [linkedin.com/in/pritam/dash](https://www.linkedin.com/in/pritam/dash) • **Github:** github.com/ipritamdash

Email: ipritamdash@gmail.com • **Contact:** [+91-8527218608](tel:+91-8527218608) • **Location:** [New Delhi, India](#)

SKILLS

Programming Languages:

Python, SQL, JavaScript, C++

Machine Learning & Data Science:

PyTorch, Hugging Face

(Transformers, Tokenizers), FAISS,

Scikit-learn, Pandas, Numpy,

Matplotlib

Backend & MLOps:

FastAPI, Docker, Git, AWS, MLflow, GitHub Actions

Databases:

MongoDB, PostgreSQL, MySQL

EDUCATION

Maharshi Dayanand University

Bachelor of Computer Applications

Grad. : Sep 2025 | Delhi, India

CENTRAL BOARD OF SECONDARY EDUCATION

Class 12 : 84 Percentage

Grad. : May 2021 | Delhi, India

CENTRAL BOARD OF SECONDARY EDUCATION

Class 10 : 92.4 Percentage

Grad. : May 2018 | Delhi, India

EXPERIENCE

Hero Motocorp | SDE Intern Jan 2025 - Jun 2025 (Gurugram, India | In-Office)

- Developed a transport billing system in AppSheet using SQL for data processing and automation. Built a React interface to streamline the company's invoice reconciliation and validation process.

Ennovations Techserve | Data Analyst Intern May 2024 - July 2024 (Noida, India | In-Office)

- Automated data workflows by integrating, Zoho WorkDrive and Apps with Zoho Analytics, reducing manual data entry by 80%. Streamlined APIs, and complex SQL queries, ensuring effective data visualization.

AIEC, IITM (AI Experience Centre) | Technical head Dec 2023 - Present (Janakpuri, India | In-Office)

- Conducted technical events for ML and WEB DEV. Represented
- AIEC on ED Talk World Conference 2024. Organized 46-hours
- long hackathon with over 1200+ participants.

BPE TOKENIZER | Transformer Text Classifier

Built a **Transformer** (Encoder-only) text classifier from scratch in **PyTorch**. Trained a custom **Byte-Pair Encoding (BPE) tokenizer** from scratch on the AG News dataset. Developed the complete training and inference pipeline for 4-category classification.

RAGSearch | Retrieve, Embed, Rank, Generate
Developed a Retrieval-Augmented Generation (**RAG**) system using **FastAPI**, **FAISS**, **SentenceTransformers**, and OpenAI's GPT-4 for research retrieval. Integrated **arXiv API** to fetch papers, converted abstracts into 384-dimensional embeddings, and performed **L2-based similarity search** in **FAISS** to generate context-aware responses with GPT-4.

Voice assistant | AI Voice Assistance Pipeline
Built a voice assistant pipeline using **Whisper** for voice-to-text, GPT-3.5 for responses, **Edge TTS** for text-to-speech. Voice Activity Detection with **WebRTC**, optimized API efficiency to achieve under **500ms response times**. Customized speech output using **Edge TTS**.

NumNet | MNIST Recognition

Constructed a **neural network** for digit and image classification with the MNIST dataset.
